

# Robotics Lecture & Demonstration

Japan is known for its centuries-old traditions which at the same time contrast with highly advanced technology. Old temples and the serene beauty of Japanese gardens juxtaposed with cities of neon light, trendy youth culture and colorful cosplayers. For the coming half year the Museum Volkenkunde will contrast the historical and the contemporary, presenting a spectacular exhibition on the topic of **COOL JAPAN** from 14 April.

In light of this exhibition, the Embassy of Japan organizes a lecture and demonstration by Mr. Tamai, who is a robotics expert and president of the innovative Muscle Corporation. He will talk about the process of inventing and developing his products as well as share his vision of the future. Introducing you to a fascinating world of robotics, Mr. Tamai will demonstrate his latest robot called KUROKO!

**Saturday 25 March 2017**

**Lecture 14:30-16:00 hrs**

Museum Volkenkunde

Steenstraat 1, Leiden

If you wish to attend the lecture, please register no later than Tuesday 21 March by sending an email to [event-reply@hg.mofa.go.jp](mailto:event-reply@hg.mofa.go.jp)
